MARKETING

GOAL

What is Doge.Finance (DFI).

- **DFI** For **Doge Finance Investment**, is the first marketplace that offers both Defi and NFT usage for investors and Artists. Doge.Finance is a DeFi & NFT token inspired by Dogecoin and Yearn.finance.
- Decentralized Finance or DeFi has been the latest development in blockchain. The DeFi market has experienced massive growth throughout 2020 and has seen continued growth and use cases in 2021. DFI is taking DeFi to the next level by combining it with algorithmic trading. This allows users to make algorithmic trades directly from their wallet without any centralized body holding onto their assets. DeFi is at the core of the DFI platform and hence driving the token utility and value of DFI.
- Anti-whale measures have also been employed with transactions greater than 0.5% of the supply being REJECTED to prevent whale manipulation.

DFI - Idea Concept

1

**Yield
Farming &
Earning.**
